PROFILE

Driven and accomplished IT professional with a Bachelor of Information Technology in Information Systems from the University of Pretoria. With over three years of experience in project management and team leadership, I bring a proven ability to lead projects to success while fostering a collaborative and dynamic work environment. Known for my outgoing and adaptable nature, I am passionate about connecting with people and contributing to a positive team culture. Equipped with a strong foundation in information systems, I excel at multitasking and am committed to continuous professional development. Now seeking an opportunity to apply my skills and knowledge in a new industry, I am eager to make meaningful contributions to organizational goals and bring value through my dedication to quality, adaptability under pressure, and passion for growth.

WORK EXPERIENCE

2019	Scotch college Perth	Residential life mentor – full time
2022	Freelance developer	Freelance full stack developer - full time
2024	Systems analyst	Systems analyst – full time

Residential life mentor Scotch College WA: After I matriculated, I took a gap year to Perth Australia to be a residential life mentor to boarding house students. Here I learnt leadership, time management and a whole lot of soft skills.

Freelance developer While in university I worked on an inventory management application that used .Net core and react.

Systems analyst While in third year at UP I helped a small partner company move from a paper-based system to an online platform. This project was then deployed to Microsoft azure. This project took the team through the whole development life cycle from designing the database to creating a custom API and deploying the front end to azure.

TRAINING

- Public Speaking Training — Dale Carnegie Academy 2017
- Life savers course — Perth lifesaving Academy 2019
- Stop the bleed – Bravo Tactical Africa 2024
